## PHOTO LUMINESCENT FILM/BOARD (1 M<sup>2</sup>)

Glow in the dark,  
photo luminescent film  
and board are  
PVC sheets with glow  
material applied  
on them.

Glow film and board are two different products. Glow film is made from soft PVC and is flexible and can be cut easily into any required shape, either with a pair of scissors or by die cutting. Glow board is made from hard PVC and is a rigid and non-flexible.

These luminous products come with or without a layer of transparent PET protective sheet. The purpose of this PET sheet is to provide additional protection to the glow surface. The PET layer must be removed if you intend to do any sort of printing on this material. Silk Screen Printing and Laser Printing are the only direct printing methods suitable for this product.

You can also choose between adhesive and non adhesive backing. Adhesive backing enables the film or board to be stuck on any normal, flat surface, free from oil or grease. While this product can be used outdoors (product code PLFGH-100. See below for details), the adhesive is not strong enough for outdoor use.

This product is a finished product and can be used to create glow signs, designs (by indirect printing), labels, or route markers in emergency situations.

### PHOTO LUMINESCENT FILM

| CODE       | DESCRIPTION     | PRICE (US\$) | BODY COLOR | GLOW COLOR |

| Above 35rolls                     | 15%off |
| Above 60rolls                     | 20%off |

**PHOTO LUMINESCENT PAPER**

It is not made from paper but from flexible vinyl, similar to glow stickers, but with a difference. This product is treated with special chemicals to allow it to be printed on by using any normal inkjet printer or laser printer.

You cannot do this with the glow stickers. This product does not come with adhesive backing.

Glow paper can be used both indoors and outdoors and has a lifespan more than 3 years but the same cannot be said for printing.

This depends on the printer. Check with the respective manufacturers for more information on this.

Photo Luminescent Paper or Glow in the dark is a newly developed product specifically for printing with normal inkjet or laser printers.
